The Best of Křižík's Fountain
Hallo Broadway
Spirit of the Fountain*

This splendid water monument and the dominant of Prague Exhibition Ground was built on the occasion of the Jubilee Exhibition in 1891 and its contemporary form takes its origins from the reconstruction that was realized hundred years later. Without exaggerating Krizik's Fountain is unique European monument that brings unrepeatable artistic experience from beautiful music accompanied by an aquatic dance with color light effects to its visitors and already attracted a lot of admirers from many countries.

Effects of the fountain are ensured by a multitude of water circuits controlled by 50 pumps and closed with nearly 3000 jets. The color effects are created by 1248 underwater spotlights of different colors, being able to perform a wide range of color shades. The sounding is ensured by means of 55 electro-acoustic amplifiers. The evening or night performances are composed from works of world's best known classical composers as well as contemporary authors.
